Notes to Users Upgrading from Version 9

- 20-20 Design Version 11 can coexist with your previous Version 9. To keep both versions, make sure you have the required available disk space (the complete Version 11 requires approximately 8 GB).
- The generic **DPLUS**, **Designers** and **Countertop Wizard** catalogs can now be downloaded from the Manufacturer Updates Section of 2020.net.
- Version 11 is installed in a separate folder from Version 9, therefore, if you have V9, you will have two versions and if you have V10, it will be overwritten. You may want to transfer your manufacturers and kit files to the version 11 environment once installed. Please contact Customer Support to get help in doing this. When coexisting, **Version 9** program files are located in **\Program Files (x86)\2020Design** and **Version 11** program files are copied in **\Program Files (x86)\Design** in **64-bit OS** environments:

Installing 2020

1. Close all applications.
2. Insert the 2020 Design DVD in the corresponding drive, wait a few minutes and the autorun should start the installation and take you to the first 20-20 Design Install screen.
If the autorun was disabled on your computer, In the Windows menu bar, click **Start**, and then **Run**. In the **Run** dialog, type the letter corresponding to your DVD drive followed by **\Setup.exe** and click **OK**.
The Windows Installer starts.
3. In the welcome screen, click **Next>**.

4. Read the License Agreement, make sure to check **I accept the terms of this agreement** and then click **Next>**.
5. Click **Typical** to install all required components.

****Custom is for advance users****

6. Select **Imperial** or **Metric** to display measurements in 2020 and then click **Install**.

The Design Setup installs prerequisite software files if necessary and then installs 2020. Installation time depends on your system performance.

7. When the Installation Successful screen appears, click **Close**.
8. Make sure to register to 2020.net if you are a new user of 2020 Design and then close this web page.

Starting 2020

1. Make sure the 2020 USB Security key is connected to your computer.
2. Click the **2020 Design** shortcut on your desktop.

3. Click **OK** when this message appears.

4. To get **training on 2020 Design**, please look up the **Help Center**.

You can use the 2020 Design Help file by clicking, **File > Help > Contents** or **File > Help > What's New** if you are upgrading to Version 10.
